

# Full Face Mask

## Performance meets comfort

Comfort is unique. Comfort is personal. Comfort is one key component to successful therapy.<sup>1,2</sup> That's why we believe comfort is important across a full night's sleep, not just during the initial consultation.

F&P Vitera™ technologies work together to provide stability, breathability, and comfort throughout the night.

90%

of patients rated the Vitera as equally or more comfortable on the face compared to their usual mask.<sup>3</sup>

## Secure and stable system.

93% of trial patients rated the mask as stable, and found that the mask stayed in place during use. 80% of these patients also experienced the same or less leak compared to their usual mask.<sup>4,5</sup>

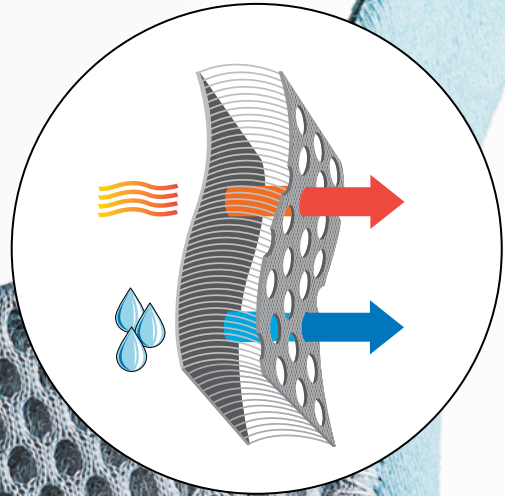

## Freedom to move

RollFit™ XT, with 93% more roll than our previous generation RollFit, in combination with the stability bar, helps to keep the seal in place.<sup>6</sup> The soft silicone seal rolls back and forth. Vitera's small seal is now smaller, and the large seal is now larger, than our previous generation full face mask.

88%

of patients could sleep in their preferred sleep position throughout the night.<sup>7</sup>

## Comfortable headgear, featuring breathable VentiCool™ technology

Vitera headgear features VentiCool, a proprietary breathable fabric inspired by sportswear that allows more air and moisture to escape than the material used in our leading range of full face masks.\*

95%

of patients rated the headgear as equally or more comfortable than their usual mask headgear.<sup>8</sup>

\* Internal testing shows the headgear with VentiCool technology allows 21 times more air-flow and at least 35% more moisture transfer than the headgear used in our leading full-face masks.<sup>9</sup>

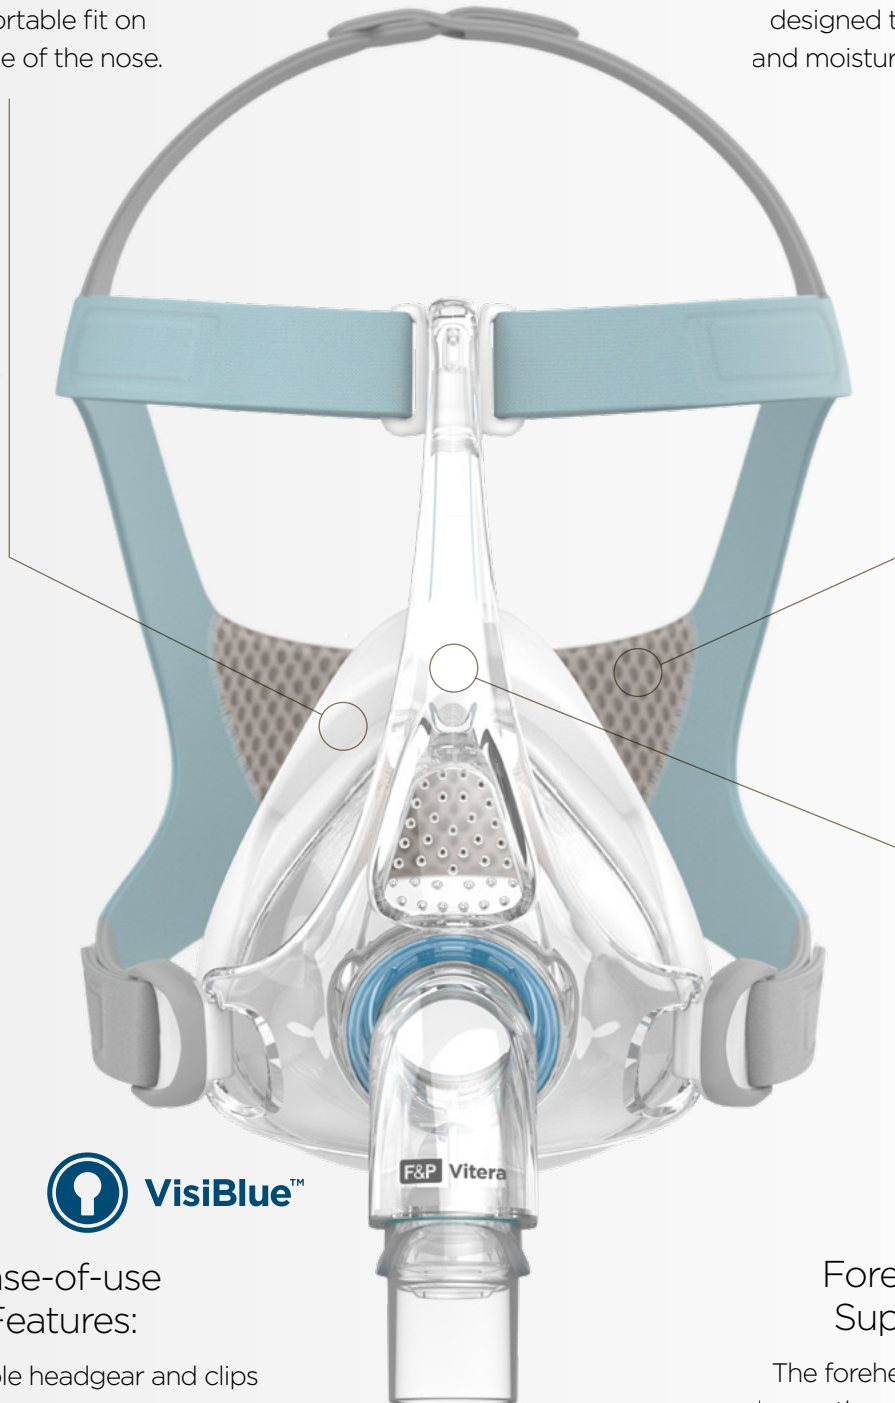

# Key features and benefits

## RollFit XT Seal

Adjusts to provide a comfortable fit on the bridge of the nose.

## VentiCool Technology

Breathable headgear designed to allow heat and moisture to dissipate.

## Ease-of-use Features:

- Adjustable headgear and clips
- Removable forehead clip

## Forehead Support

The forehead support keeps the mask in place.

# Fitting guide

## Step 1.

Hold the front of the mask with one hand and the headgear with the other. Ensure that one headgear clip is unhooked from the frame.

## Step 2.

Place the seal onto your face and guide the headgear over your head.

## Step 3.

Hook the unattached headgear clip onto the frame.

## Step 4.

Gently tighten the headgear straps starting with the bottom straps, followed by loosely fitting the blue forehead straps.
